## VFI'S STEEL INSERT SYSTEM

### For Square Posts

### For Columns

When used in conjunction with 40wt galvanized pipe, the A BEAM (or equivalent), and powder coated stainless steel beam brackets, the *Steel Insert System* establishes a metal to metal connection, creating a large open pergola that is structurally sound.

*Powder Coated Stainless Steel Beam Brackets & Screws*

### Structural Aluminum A Beam for Pergola Systems

**Fits hollow 2" x 6" or 2" x 8" PVC Profiles.**  
**Spans up to 16' between posts.**  
**Available in 12', 14', 16' lengths.**
